

ENVIRONMENTAL SERVICES

Providing support for environmental solutions

New eco-trends and health and environmental legislation require product compliance by manufacturers, suppliers, retailers, and distributors across the globe. As a result every company has to ensure that they minimize the impact their activities have on the environment.

Intertek, the leading solutions provider, offers professional and technical services which help our customers in various industries. Our Mombasa office based at Kizingo, encompasses Technical and Environmental experts who attend to clients to carry out quality services and solutions to industrial and commercial facilities with the East Africa Region.

Our services span the entire water life cycle. We help our customers to explore water properties and to produce quality improvements through appropriate technologies

The challenge

The Kenyan Environmental Management and Coordination, (Water Quality) Regulations of 2006 and the Environmental (Impact Assessment and Audit) Regulations of 2003 require the following:

- Water quality monitoring for sources of domestic water
- Effluent discharge quality and quantity monitoring
- Application for effluent discharge license
- Undertaking Environmental Impact Assessments for new projects
- Undertaking Environmental Audits

The solution

Intertek Kenya has NEMA registered Lead and Associate experts who carry out independent Environmental impact Assessment audits(EIA/EA) according to the provisions of the Environmental Management and Coordination Act, 1999 and the EIA/EA Regulations of 2003 as administered by the National Environmental Management Authority (NEMA)

Intertek Mombasa laboratory is a NEMA accredited laboratory capable of carrying out full testing services on drinking water and wastewater to various types of clients including the hotel and other industries throughout the country

The analysis undertaken includes

- Physical, chemical and microbiological analysis for drinking water (portable and bottled)
- Effluent analysis as per requirements of the Environmental Management and Coordination, (Water Quality) Regulations 2006
