

Comprehensive Support for REACH 2018 Registrations

Regulatory Services

Intertek

Valued Quality. Delivered.

European Union (EU) producers, users and importers need to prepare for the final REACH registration deadline on the 1st June 2018, which covers all phase-in substances manufactured or imported into the EU at and above 1 tonne per year not previously registered.

Those in scope need to implement their action plans now, to ensure they will remain in the market. There are consequences to not meeting the deadline. Non-compliance with the REACH regulation could subsequently lead to the removal of substances from the EU market for a period of time. This could result in not only financial costs to business but damage to brand and reputation with customers.

Many of those involved with 2010 and 2013 registrations will understand the importance of being well prepared for the fast approaching 2018 deadline and the need to start preparing. A company is exposed to increased business risk by starting compliance efforts late.

Boost your stretched resources and/or avoid potentially costly errors made by the inexperienced and benefit from our experts and their deep knowledge of the REACH regulation.

Intertek has an enviable record of successful 2010 and 2013 registrations and can support your 2018 registration needs delivering comprehensive registration services for REACH in a timely and cost effective manner.

There are several advantages to act now:

- Management of registrations in the required timeframe
- Testing and studies completed in time
- Avoidance of compromises to meet compliance
- Enough time for reworking the dossier following submissions with updates

Intertek Health Environmental & Regulatory Services (HERS) can support with the technical know-how needed to create robust dossiers and chemical safety reports, ensuring a company can meet this final 2018 REACH deadline, by doing the right thing, the right way, the first time.

Steps to Success:

- Strategic planning of registration projects
- Substance identification and characterization
- Data gap analysis
- Data gathering and study monitoring
- Facilitate "Letter of Access" negotiations with Lead Registrants and Consortia
- Preparing relevant Chemical Safety Reports (CSR) that cover client's use patterns
- Build IUCLID Dataset
- Prepare and submit registration dossier in REACH-IT
- Project management from start to finish

REACH Registration Services

HERS offers full registration services under REACH. This includes development of the technical dossier, Chemical Safety Assessment (CSA), exposure scenarios, Persistent, Bioaccumulative and Toxic (PBT) assessment and preparation of extended Safety Data Sheets. Our REACH services are delivered by a dedicated European based team, supported by a global network of experts in risk assessment, toxicology, eco-toxicology and testing.

REACH delivery tailored to your company's requirements:

- Strategic consultancy/ Smart Planning – providing strategic 2018 REACH registration advice and guidance
- Consortia management and SIEF / consortia representation
- Collecting relevant data in the public domain
- Data evaluation and gathering (Klimisch criteria)
- Identification of analogues/read across/ grouping
- Intelligent test strategies/non-testing proposals – test study management and monitoring
- Exposure assessment /scenarios & PBT assessment
- Lead and Joint Registrant dossier preparation and submission of dossiers
- CSA / CSR preparation
- Dealing with authorization
- Reviewing and revising classification and labelling (EU CLP / UN GHS)
- Education and training
- REACH Only Representative
